Dear Mayor Bronconnier:

My name is . I'm 9 years old. I'm in grade 4.

I think we should pay for garbage to limit it because if we don't the world will be a big dump.

If you have 5 people in the house, you could have a certain amount of garbage. A house with only 1 person could have less than them. If you have more than the amount, you would have to pay extra, just like library fines if you bring the book back late.

This would help because people would know not to make so much garbage.

Thank you for helping the city of Calgary.

Sincerely yours,

Grade 4

Dear Mayor Bronconnier:

Hi! My name is \_\_\_\_\_, and I think we should do something about Calgary's garbage. It's important because if we don't recycle the world would be a dump! One idea to help the environment is to make plastic bins for yogurt containers and margarine containers and others. My second idea is to put more compost bins in more stores. My third idea is to put more garbage cans in lots of park so that there won't be garbage all over the place.

Sincerely yours,

Dear Mayor Bronconnier:

Hello. I'm \_\_\_\_\_ and I care about God's creation! I was thinking that we can recycle a bit more. I would like it if we could recycle plastic and cans at the same time. That way there will be less garbage. Thank you!

Sincerely yours,

Dear Mayor Bronconnier:

My name is . I'm 9 years old and I think we should have more buses and more trains because I think that a bus with 75 people takes up less gas than 75 cars does. I think it's important because if we use up too much gas it will pollute the air and the city will be yucky and no one will go out side. I think that if we use more buses or trains then the city will stay cleaner.

Sincerely yours,

Dear Mayor Bronconnier:

My name is . I am 9 years old. I want to help the environment. So I thought that we should start recycling plastic because the dumps are getting full. So if you could set up plastic recycling centers that would be great. Thank you.

Yours truly,

---
